TO WHOMSOEVER IT MAY CONCERNE:

We, St Xavier's College (Autonomous), Mumbai, and our units – Main Library, Blatter Herbarium & Heras Institute of Indian History and Culture, have been using the products ScanCraft Book Scanner and Webgenic eLibraryPlus Server Software made by Webgenic Technology Solutions, Pune (Maharashtra, India) since 2015.

While their products are at par in quality & performance with most imported products in the same category in the market, they are competitively priced and provide great value for money. Their products met our requirements and are easy to use. They provided us with adequate training to help us use the product to it's full potential and have received technical support promptly whenever requested.

We would be happy to recommend this product to other organizations.

Dr Rajendra Shinde
Principal
